***Response to Amendment***

Applicant's arguments filed 12/05/2003 have been fully considered but they are not persuasive. The Response submitted by Applicant does not overcome the rejection made by Examiner in the last office action.

Claims 1-14, 24-31 and 39-42 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chem Abstract 118: 9914.

The rejection is maintained for the reasons as stated in the last Office action and for the following reasons:

Applicant's arguments are based on the characteristic such as the compositions having very low optical loss at telecommunication wavelengths and "the energy curable compositions and polymeric materials of the present invention suitable for optical applications have an absorption loss of below about 0.5 dB/cm at a wavelength of 1550 nm".

Said arguments have been fully considered but they are not persuasive since they are not commensurate in scope with the claims.

Note that this is the claimed composition in that no specific reactants have been claimed nor specific steps of the process to form the compound of the claimed formula.

The reference clearly discloses specific components which are read on the very broad teachings of the claimed composition. Therefore, it would have been obvious to one of ordinary skill in the art to select reactants under conditions to form the products of the claimed formula in the absence of a showing of unexpected results derived from said use.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
